

Thomas (Suzhou) Metals Co. Ltd.

QUALITY POLICY OF THOMAS GROUP

Annex 11 to QM-Manual

Customer satisfaction as a strategic goal

Satisfied customers are our top priority. We achieve this goal through high flexibility and continuous monitoring and improvement of our processes. The trust our customers have placed in our company over many years and the quality of our products must be preserved and expanded wherever possible. Should a complaint or a customer claim nevertheless arise, we will process it promptly and effectively. In addition, effective remedial measures must be taken so that a mistake cannot recur.

Employees as the foundation of the company

Our employees are the basis for the success of our company. Their detailed specialist knowledge and their behaviour in dealing with our products are decisive for the achievement of our corporate goals. We appreciate the personal responsibility and the understanding of quality of our employees. The quality of our products depends on the qualifications of our employees as well as the working materials used. We therefore attach great importance to education and training as well as the provision of suitable working equipment.

Focus on environmental compatibility and sustainability

We feel particularly committed to the issues of environmental compatibility, economic efficiency and sustainability. The sustainability of our products in particular is increasingly becoming the focus of a comprehensive analysis of our company. We therefore commit ourselves to making the manufacture of our products as resource-saving as possible. Care must be taken to ensure that hazards or damages to the environment are avoided at all costs.

Standards for ethics, labor and human rights as a corporate goal

We have developed a compliance management system that is centered on the participation and empowerment of all employees in the company, which is achieved through targeted information and training. The code of conduct, as well as guidelines on compliance, data protection, protection against discrimination, and protected procedures for complainants and whistleblowers, are important cornerstones in implementing this policy. These principles must be observed in particular when procuring goods and services. The challenges for the labor relations of the future and the corporate social responsibility (CSR) of companies are constantly increasing due to the growing importance of social and environmental responsibility. We are committed to complying with international standards for labor and human rights and to implementing consistent values and management guidelines within the Thomas Group.
